A close relative to our bestselling Madaket, Miacomet has tones of brown and grey that mix together to be reminiscent of driftwood. This wire brushed oak flooring is created by craftsmen resulting in a tonal depth by hand-applying and buffing in multiple coats of reactive stain to achieve this color.

Sawyer Mason floors are constructed from real wood. Wood is a natural material derived from a living tree. Thus, every piece of Sawyer Mason flooring will have a unique appearance often expressed as naturally-occurring color variation, texture, and grain patterns.

In person and online photographic images, or samples provide a representation of the product's appearance, but are not always comprehensive in terms of the full range of color, texture, and grain variations found in the finished product. Images provided on the Sawyer Mason website, as well as any pamphlets or brochures provided, are for reference only and should not be used as the sole basis for choosing a particular style of flooring.
